

Roof flashing aluminium

THE UNIVERSAL SOLUTION FOR RELIABLE ROOF FLASHING

THE ADVANTAGES

Material offers 60% flexibility for faster and easier installation

UV resistance ensures increased longevity and stability

Excellent adhesion due to UV-stabilised butyl strip

Malleable with increased strength due to reinforced aluminium mesh

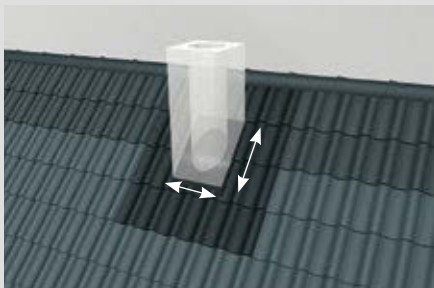

Suitable for multiple applications as lead replacement flashing

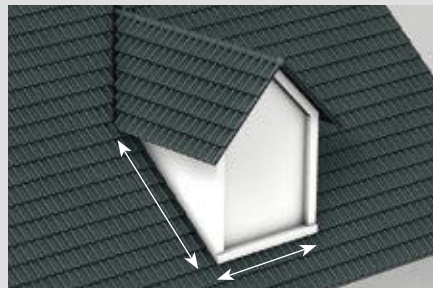

Roof flashing aluminium

AREAS OF APPLICATION

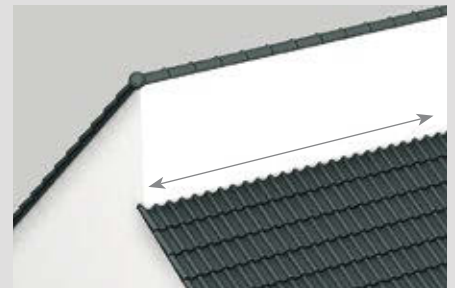

The new universal aluminium flashing offers a universal solution for numerous applications – especially for flashing roof penetrations at the roof covering.

Chimney flashings
